

# SMB Essentials on Azure

A Click-to-Run™ Solution from TD SYNEX

SMB Essentials offers everything that your customers' need for their modern ICT all-in-one bundled solution.

This Click-to-Run™ solution has been optimized so SMB partners can easily customize and build a reliable infrastructure running on Microsoft Azure, delivering a versatile and scalable modern computing environment in a single deployment.

This solution includes a virtual network or option to add an additional virtual network, create a storage account, we provide options to deploy a File Share, Windows Domain Server, and Azure SQL Database.

## Key Features

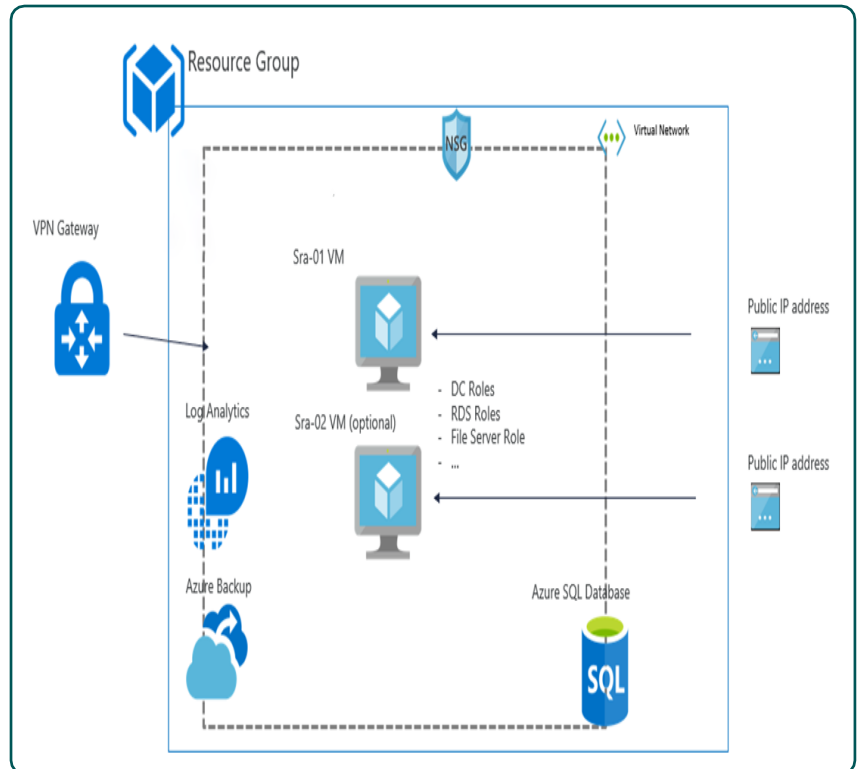

- Secure, reliable and (cost) efficient all-in-one ICT system, designed to make your SMB business future proof.
- Focus on your business needs instead of spending the time and money it takes to plan, procure, secure, and manage the right infrastructure to meet your application needs.
- You can select different initial sizing for your IT foundation. Cost-effective packages.
- Customize your deployment with different VM sizes to meet your customer needs.

## Core Infrastructure

- Windows Server options
- Choice of up-to 5 additional VMs
- Azure Backup
- Log Analytics
- Azure SQL Database

## Business Outcomes

- Modernize IT Infrastructure
- Reliable IT Foundation & Scalability
- Disaster Recovery
- Legacy Applications hosted in the Cloud

## Deployment Options

- VM Deployment Type – new or existing
- List of compute instance for the main virtual machine
- Options for Windows Server type
- Storage account
- Option to enable Azure Backup
- Deploy a Log Analytics
- Enable Azure SQL DB
